Quassel IRC - Bug #1045

Quasselcore crashes after trying to send a message in a query where a blowfish key has been set

01/31/2011 01:19 PM - brot

Status:	Resolved	**Start date:**	01/31/2011
Priority:	Normal	**Due date:**

Category:	Quassel Core	**Estimated time:**	0.00 hour
Target version:	0.7.4		
Version:	0.7-pre	**OS:**	Any

Description

The Quasselcore crashes when one tries to send a message to a query where a blowfish encryption key has been set with "/setkey mumu" (or any other key)

This behaviour is always reproducable. Even after i recompiled QCA and the Quasselcore with the same Qt version, the problem persists.

1. open a query window with someone
2. /setkey secretkey
3. write something
4. core crashes

Revision 393ac8b4bca9db98f297cb4756ef2e79364bf6f0 - 03/17/2011 02:19 PM - johu

check for qca provider plugin, fixes #1045

Prevents core from crashing when qca provider plugin is missing.
The plugin is needed at runtime. Can occurres when packagers did
not install it.

not install it.

History

#1 - 01/31/2011 09:27 PM - johu

- Status changed from New to Resolved

Cause is missing qca-ossl qt plugin on system. Needed for working blowfish encryption. See http://delta.affinix.com/qca/

#2 - 03/17/2011 02:19 PM - johu

- Target version set to 0.7.2

#3 - 03/22/2011 06:10 PM - johu

It can only occure if packagers did not install qca-ossl. I added a small fix to prevent this bug see http://gitorious.org/quassel/quassel/merge_requests/122.

#4 - 03/24/2011 04:20 PM - johu

- Target version changed from 0.7.2 to 0.8.0

#5 - 03/25/2011 12:41 PM - johu

- Target version changed from 0.8.0 to 0.7.3

#6 - 09/08/2011 10:58 PM - johu

- Target version changed from 0.7.3 to 0.7.4
