Target version:	0.13.0		
OS:	Any		

Description

The current method of checking away statuses (Using /who periodically) is delayed and hacky.
There is a IRCv3 capability designed to fix this, which should be used on servers that have it.
You can see the specification here: https://github.com/atheme/ircv3-specifications/blob/master/extensions/away-notify-3.1

History

#1 - 07/16/2018 06:06 AM - genius3000

- Status changed from New to Resolved

- Target version set to 0.13.0

- % Done changed from 0 to 100

Implemented in: https://github.com/quassel/quassel/commit/51ced68c9ba7f733c354e0b2dc737caa1f436a47
