Description

I have completely translated Quassel 0.4.0 into Slovenian, but when testing the translation I have noticed that some parts of Quassel are not shown translated:

- toolbar (button text and sumbenus)
- context menu for buffers in buffer list (except the last item) and submenus
- context menu for nicknames (exept for the first item) and submenus
- the last two items in main chat view context menu and all submenus

There is also a string "Main Toolbar" (for example in View → Toolbars) that can't be translated

All others translations are available and translated.
Possibly a thingamajig missing in the translation use process?
