

Quassel IRC - Bug #1099

Quassel client crash

09/15/2011 07:02 PM - kitterma

| | | | |
|---|----------------|------------------------|------------|
| Status: | New | Start date: | 09/15/2011 |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | Quassel Client | Estimated time: | 0.00 hour |
| Target version: | | OS: | Any |
| Version: | 0.7.2 | | |
| Description | | | |
| Wasn't doing anything special when the client crashed. This is 0.7.2 + the patch for the CTCP security issue. See attached kcrash file for details. | | | |

History

#1 - 09/17/2011 09:48 AM - eliasp

- File *quasselclient-20110917-094022.kcrash* added

Same happened here. Had my laptop running over night and found DrKonqi showing the Quassel crash in the morning.

Running Quassel 0.7.3 built with the following Gentoo USE flags:
"X dbus kde phonon ssl webkit -ayatana -crypt -debug -monolithic -postgres -server"
