

Quassel IRC - Bug #114

double-click on url doesn't work with https

02/22/2008 04:42 PM - phon

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.13.1		
Description			
<p>The double-click handler only recognizes http://domain.tld/ It would be nice if it would also support https://domain.tld/ and perhaps also recognize http if there is something directly ahead. As an example - join #amarok.de then you get: [13:17:48] * Topic for #amarok.de is "http://amarok.kde.org/de :: Amarok 'Fast Forward' 1.4.8 veröffentlicht! :: Amarok 2 Tech-Preview 1 http://tiny.cc/RMxUy :: datten macht morgen beim wettshirtcontest mit!!!" [13:17:48] * Topic set by apachelogger_ on Mon Feb 11 20:07:19 2008 http://amarok.kde.org/de is also not clickable here because of the prepended quotation.</p>			

History

This is a known issue.

As it has been stated on introduction and in the handler this is more than a dirty hack.

There are even more occasions where it won't work. The handler will die when the chatwidget and the chatlines receive their long awaited overhaul.

-> won't fix
