Version:	0.8-pre		
Description			
See first line of attached image.			

History

#1 - 09/06/2012 06:01 PM - Anonymous

Do you happen to know whether there are any unicode chars on that line? I have this issue only when there are some larger characters (such as with mandarin), which probably breaks the extent calculations.

#2 - 09/06/2012 10:58 PM - TheLink

No, there weren't any unicode glyphs in that line. Just normal ASCII chars.

#3 - 09/07/2012 03:22 PM - TheLink

- File *Cut_Text.png* added

Another case of cut text.

#4 - 09/07/2012 03:30 PM - Anonymous

Can you paste a copy of the contents of the message (hoping it doesn't get mangled along the line)? Could you also share your font settings?

#5 - 09/07/2012 03:35 PM - TheLink

My font setting for the chat view is INCONSOLATA 16pt.

I'm not a friend of publicly cross posting channel contents so I'll PM you the content.
