

Quassel IRC - Bug #1212

text inputWidget doesn't expand in size in multiline mode on Mac OS X

04/12/2013 10:56 PM - stepheneb

Status:	Resolved	Start date:	04/12/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Quassel GUI (Qt)	Estimated time:	0.00 hour
Target version:		OS:	Mac OS X
Version:	0.9-pre		

Description

Multiline mode is enabled. When I enter multiple lines by pressing shift-enter the multiple lines are displayed correctly in the inputWidget but the inputWidget doesn't expand in size so the previous lines scroll up an out of sight.

Screenshot from Mac OS X:

I have a branch where you can see what I've tried in my attempts to fix the problem:
<https://github.com/concord-consortium/quassel/tree/expand-multiline-entry-on-macos>

I know very little about C++ or QT ... and the work in that branch does not fix the problem.

Perhaps it's just a bug in WT's QComboBox::AdjustToContents on Mac OS X.

I checked the QT bug tracker and didn't see a bug there.

System:

Mac OS X 10.6.8
QT 4.8.4 installed with homebrew

Tested on both stable v0.8.0 release of quassel and master branch build from 20130412:96d18ff3
