

Quassel IRC - Feature #1237

Use the IRCv3 "away-notify" capability if it is available.

Category:	Quassel Core	Estimated time:	0.00 hour
Target version:	0.13.0		
OS:	Any		
Description			
The current method of checking away statuses (Using /who periodically) is delayed and hacky. There is a IRCv3 capability designed to fix this, which should be used on servers that have it. You can see the specification here: https://github.com/atheme/ircv3-specifications/blob/master/extensions/away-notify-3.1			

History
