

Quassel IRC - Bug #1264

Client displays incorrect identity in chat on non-standard IRC implementation

02/25/2014 04:17 AM - Ephemeralis

Status:	New	Start date:	02/25/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Windows
Version:	0.9.2		
Description			
When connecting to the Bancho IRC implementation (irc.ppy.sh), client forces an invalid identity to be assumed which cannot be changed from due to the implementation's lack of an allowed NICK command. Client retains this identity throughout all changes and receives highlights from it as if it were a normal identity, even though it does not exist as one.
