Description			
Hi,			
I would like to ask to implement a autoghost feature. Sometime, when we lose connection to IRC servers, our name is changed.			
So if we are in ns group (example : Dr-Shadow/Dr-Shadow_/Dr-Shadow__)			
Would it be possible to switch to first nick automatically ?			
This could be done in two ways :			
_ We ghost first nick automatically when we are reconnecting to IRC servers.			
_ We switch to first nick automatically if possible (when the ghost is released by IRC server)
