| Description | | | |
| <p>Lot of IRC client have a /clear command which wipe the current chat window content. That is quite handy when you have finished reading a channel or there is too many content on it.</p> <p>While at it, the command would need a keyboard shortcut, ideally defaulting to Ctrl + L which is common in terminals.</p> <p>I am using Quassel from Debian/testing: v0.10.0 (dist-575f27e)</p> | | | |
