

Quassel IRC - Bug #1364

Random PM's

06/14/2015 01:56 AM - pitastrudl

Status:	Closed	Start date:	06/14/2015
Priority:	Normal	Due date:	
Assignee:	pitastrudl	% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:		OS:	Windows
Version:	0.11-pre		

Description

So on a network, im getting random personal messeages, at first it looked like that, then i asked the ircop why.

If you /msg (prefix)#Lounge, it messages everyone with that prefix and above.

For example, I message channel ops as /msg %#Lounge ,Reaches everyone halfop and above.

Because everyone else who is voice and above can also message +#Lounge back.

It's like another channel without it being another channel.

server running InspIRCd 2.0. quassel is 0.12.2, windows 64bit.

looked like it was related to these settings <http://i.imgur.com/t9EAe0b.png>. report can be closed

#2 - 01/20/2018 10:13 AM - genius3000

- Status changed from New to Closed

Closed as user found a solution. This also sounds like the STATUSMSG bug, which is fixed in git master (0.13-pre) after commit 441d136436d670f520ab351dd8bf97363de713b
