

Quassel IRC - Bug #1369

Keeps rejoining to channels I've left

07/22/2015 02:29 PM - gry

Status:	New	Start date:	07/22/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.10.0		
Description			
Quassel keeps rejoining to channels I've left but didn't delete from my list. 0.12.2, arch linux. Reported by qptain_Nemo and caster on IRC.			

History

#1 - 10/18/2015 01:00 AM - heftig

I'm seeing this as well on my core (0.12.2, Arch Linux).

Parting a channel produces one of these messages for every user that was in the channel:

2015-10-17 22:57:20 Warning: Channel "<channelname>" received data for unknown User "<username>"

It seems that the `joined` column of the buffer in the database is never updated, either on join or part. New channels have it initialized to True, then it never changes. Manipulating this value manually has the desired effect.

Is there anything else I can do to help debug this?

#2 - 02/13/2016 05:25 PM - MBasaglia

Looks like this has been fixed, I had this bug with quassel v0.12.2 (dist-9c5e6c6) but works fine with quassel compiled from git master.
