Target version:		OS:	Any
Version:	0.10.0		
Description			
<p>It regains focus when I start typing, but in the (somewhat common) case where I hit tab and then hit backspace to remove the username again, this hides the channel as if I had been in the channel list.</p>			
Reproduce:			
<ul style="list-style-type: none">- Go into IRC channel- Type the first letters of a nickname- Hit tab to complete- Hit backspace			
This is with version 0.12.2
