

Quassel IRC - Bug #1466

Quassel does not remember last used nick after re-connect

01/15/2018 01:48 AM - public

Status:	New	Start date:	01/15/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		OS:	Any
Version:	0.12.4		

Description

1. set primary nick in the identity to 'sveta'
2. connect to an irc network
3. /nick not_sveta
4. reconnect

Expected result: connect as not_sveta because it was my conscious nick change on this network

Actual result: connect as sveta

Perhaps this is in conflict with the whole concept of 'identity'. But this is how some people expect it to work, so I'd like to leave a note of this here.

History

I have to agree that this would conflict with concept of identities. I don't expect Quassel to save/remember manual nick changes; I prefer having to add it to the identity.

Perhaps a command to add current nick (or change and add) to the used identify would suffice.
