Killed by SIGSEGV pid=0x004a ppid=0x0041 tid=0x0001 slot=0x00a1 pri=0x0200 mc=0x0001 ps=0x0010 C:\USR\BIN\QUASSEL.EXE cs:eip=005b:37b1e400 ss:esp=0053:0094ed40 ebp=0094ed6c ds=0053 es=0053 fs=150b gs=0000 efl=00010202 eax=00000000 ebx=0094ed94 ecx=0000000d edx=00374a77 edi=01220ca0 esi=0094ef08 Process dumping was disabled, use DUMPPROC / PROCDUMP to enable it.  Any idea what this could be...  I compiled with gcc 4.9.2 and cmake and the OS is OS/2			

#### Associated revisions

##### Revision d2629d34 - 12/06/2018 09:46 PM - Manuel Nickschas

client: Don't use list initialization for QStringList

The minimal build requirements we defined for the 0.13 branch don't support list initialization for QStringList, so replace the two places where we accidentally slipped that in by the legacy way of doing things.

Fixes #1503.

#### History

##### #1 - 11/25/2018 11:03 PM - tellie

I just compile v0.13RC1 and that worked fine like it should..

##### #2 - 12/02/2018 07:54 PM - tellie

I also build v0.13RC2 and that has same behavior as v0.13

So it seems something is broken between RC1 and RC2

### #3 - 12/02/2018 10:34 PM - tellie

Seems it's this changes [e7352d23bb54ce36dd4f9aac59a93e2c0a6297f6]

I get error when building quassel

```
networkmodel.cpp: In member function 'virtual QStringList NetworkItem::propertyOrder() const':
networkmodel.cpp:58:73: error: no matching function for call to 'QStringList::QStringList(<brace-enclosed initializer list>)'
static QStringList order{"networkName", "currentServer", "nickCount"};
```

and :

```
networkmodel.cpp:303:64: error: no matching function for call to 'QStringList::QStringList(<brace-enclosed initializer list>)'
static QStringList order{"bufferName", "topic", "nickCount"};
```

And i have to change this to get it build under OS2  
but i think is a bad fix, and thats why it wont run quassel...

```
QStringList NetworkItem::propertyOrder() const {
static QStringList order{"networkName", "currentServer", "nickCount"};
return order;
}
```

change to this to get it build:

```
QStringList NetworkItem::propertyOrder() const {
#ifdef OS2
static QStringList order{"networkName", "currentServer", "nickCount"};
return order;
#endif
}
```
