

## Quassel IRC - Bug #152

### high I/O load causes core to timeout from irc server

04/21/2008 11:48 AM - katastrophe

<b>Status:</b>	Resolved	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	EgS	<b>% Done:</b>	0%
<b>Category:</b>	Quassel Core	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>OS:</b>	Any
<b>Version:</b>	0.13.1		
<b>Description</b>			
i have a quasselcore and an inspircd running on the same host. randomly, the core disconnects from the server with [Ping timeout: 41 seconds] in the servers status buffer. i connect over ssl.			

#### History

ok i somehow got it...

quassel seems sensible to high disk/cpu load. this happens when i start a resource-intensive rsync backup.

i also notice a slowdown in quassel(it takes approx. 1 minute to process a message and send it to the irc server).

i tried to renice the process with -10, but that didnt help much.

dont know if this can be fixed, but if i should test more say so.

##### #2 - 06/22/2008 04:25 PM - EgS

This is a known issue. Storing in the sqlite db is a blocking call that is affected by high I/O load of the system. This cannot be fixed decently with sqlite and should be history with a new storage backends.
