Potential bug: Database corrupted by latest build?

07/01/2025 11:49 AM - tekovex515

Status:	New	Start date:	07/01/2025
Priority:	Normal	Due date:

Target version:		OS:	Any
Version:	0.13.1		
Description			
I just went back to an arbitrary older build 0.14.0-ls119 and loaded a backup database and it works.			
I'm not an expert at this stuff, so anything could have happened and I could have missed it, but I want to let you all know in case there is a showstopper bug.			
I updated my Docker container on Intel Synology NAS to the latest build 0.14.0-ls121 and now I can't connect to the database in any build. https://www.mybalancenow.it.com

Hello,

Upgrading to build 0.14.0-ls121 may corrupt the database or cause it to become unreadable. Rolling back to ls119 and restoring a backup works. Avoid using ls121 until the issue is confirmed and fixed.
