Version:	0.13.1		
Description io games are a popular genre of online games built around fast gameplay and real-time competition. Played directly in a web browser, these games remove the need for downloads or installations, making them instantly accessible to players of all ages. With short matches and simple mechanics, IO games are perfect for quick entertainment or extended competitive sessions. * Simple Gameplay, Deep Challenge * Most IO games are easy to learn, often using basic controls like mouse movement or a few keyboard keys. This simplicity allows new players to start immediately. However, surviving longer and climbing the leaderboard requires skill, awareness, and smart decision-making. As a result, IO games remain challenging and rewarding even after many hours of play.
