

Quassel IRC - Bug #336

Query buffer active/inactive is not always accurate after nick changes occur

10/05/2008 05:46 PM - TerrorBite

Status:	Resolved	Start date:	
Priority:	High	Due date:

Target version:		OS:	Any
Version:	0.13.1		
Description			
<p>This bug appears to occur whenever a person changes nick and query windows were open to both the new and the old nick. Here is an example:</p> <ol style="list-style-type: none">1) You are talking in PM to a friend with the nick User. Their query buffer shows as active.2) User_2 joins the channel and PMs you to explain that their connection died. User_2's query buffer shows as active.3) User quits with a ping timeout, and their query buffer changes to inactive (greyed out). So far, all is normal.4) User_2 changes nick to User. HOWEVER, User's query still shows as inactive, and User_2's query still shows as active, despite the fact that User_2 is no longer on the channel, and User is.
