

## Quassel IRC - Feature #407

### extend SSL error message

11/17/2008 03:06 PM - pennywise

<b>Status:</b>	Resolved	<b>Start date:</b>	
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	EgS	<b>% Done:</b>	100%
<b>Category:</b>	Quassel Client	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.4.0		
<b>OS:</b>	Any		

#### Description

is:  
  
"The host name did not match any of the valid hosts for this certificate"

should be:

```
"The host name 'foobar.com' did not match any of the valid hosts for this certificate ('foobar.de')"
```

#### History

##### #1 - 02/11/2009 01:26 AM - EgS

- Status changed from New to Resolved
- Assignee set to EgS
- Target version set to 0.4.0
- % Done changed from 0 to 100
- OS set to Any

That error string ("The host name did not match any of the valid hosts for this certificate") generated by Qt's SSL backend.

But all SSL errors are now displayed in a nice manner. You can easily check the certificate now too, so you'll know what hostnames the cert was issued for.
