

Quassel IRC - Bug #597

User mode removal

03/06/2009 10:29 PM - Lingerance

Status:	Rejected	Start date:	03/06/2009
Priority:	Normal	Due date:	
Assignee:	EgS	% Done:	0%
Category:	Quassel Core	Estimated time:	0.00 hour
Target version:	0.4.0		
Version:	0.4.0	OS:	Any
Description User modes are removed when connecting to a server. *** Mode Lingerance +xz by Lingerance *** Mode Lingerance -x by Lingerance The first line is actually the server setting the user mode, the second is Quassel removing +x (cloaking on SlashNet).			

History

- Status changed from New to Feedback
- Assignee set to EgS

Quassel restores your old user modes during session restore. So unless you explicitly issued a mode -x in your last session, this is most likely due to upgrading from an older version that didnt have this feature.

Just set mode +x and everything will be fine in the future (even after core restarts).

Let me know if the issue still occurs.

#2 - 03/08/2009 10:39 PM - Lingerance

Oh, that explains it, I did upgrade the core recently. So far I've been disconnected from SlashNet a few times since then (I had manually added the +x again) and haven't had the issue.

- Status changed from Feedback to Rejected

thanks for the feedback.
In this case I think I can close the BR.

#4 - 08/29/2009 08:02 AM - Lingerance

Actually, it did this again when I created a new server. This was from a recent git version (shortly after styling was merged).

#5 - 08/29/2009 09:28 PM - Lingerance

Quassel will also remove +o after I've issued /oper for the same reason. I had the /oper statement in the "commands to execute on connect" box.
