

Quassel IRC - Feature #607

Allow full access to networks out of bufferlist

03/07/2009 04:54 PM - DevUrandom

Status: Resolved	Start date: 03/07/2009
Priority: Normal	Due date:

Category: Quassel GUI (Qt)	Estimated time: 0.00 hour
Target version:	
OS: Any	
Description I expected I could right click on a network in the bufferlist and go >configure. Does not work that way... Some other options may be possible for networks which I did not yet think about, but which Joe User might expect to find right there in the list of networks.

Add a Configure menu item to Networks in the buffer list

Add 'Configure' above 'Disconnect' in the right-click menu from a network in the buffer list. Clicking 'Configure' will open the Configure Networks dialog to the selected network.
Fixes #607
