

Quassel IRC - Bug #625

editline jumps funny

03/14/2009 07:25 PM - xAFFE

Status:	Resolved	Start date:	03/14/2009
Priority:	Normal	Due date:	
Assignee:	Sputnick	% Done:	100%
Category:	Quassel GUI (KDE)	Estimated time:	0.00 hour
Target version:	0.5.0		
Version:	0.3.0.x	OS:	Any
Description			
When I'm typing a message, the editline jumps strangely. I have attached a vid of this.			
I'm using quassel-git and kde 4.2

Revision b59ac9eaf6ab7580bca7d2cde3849229ddd11483 - 04/11/2009 10:29 AM - Manuel Nickschas

Consider `frameWidth()` for setting the inputline height

Turns out that the problem of being too large if we do this seems to be an issue with a new `documentMargin()` property in Qt 4.5. Setting this to 0 and adding the `frameWidth()` to the font height should fix #625.

Revision b59ac9ea - 04/11/2009 10:29 AM - Manuel Nickschas

Consider `frameWidth()` for setting the inputline height

Turns out that the problem of being too large if we do this seems to be an issue with a new `documentMargin()` property in Qt 4.5. Setting this to 0 and adding the `frameWidth()` to the font height should fix #625.

History

#1 - 03/14/2009 08:01 PM - jesperht

In `src/uisupport/inputline.cpp`, if you change:

```
setMaximumHeight(document()->size().toSize().height());
```

to

```
setMaximumHeight(document()->size().toSize().height()+2);
```

It works according to xAFFE (couldn't reproduce it on my system).
