<b>Category:</b>	Quassel GUI (Qt)	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>OS:</b>	Linux		

#### Description

It would be rather useful to be able to monitor more than one channel at a time, using some sort of split mode, so one can put channels next to each other, or on top of each other. This would make quassel way more useful for larger displays.
