Description

I'm unable to read the dialog "about quassel" (see screenshot in attachement). As you can see, it is okay in the upper part, but not in the lower part.

I'm using KDE 4.2.3 with bespin as kde-style. Quassel-version: v0.4.0 [+163] (git-3c9e07c)

- Status changed from New to Resolved

I am unable to reproduce this issue on Windows 10 20H2 or Fedora 34 (KDE), both running Quassel 0.13.1 or newer.

I suspect that at some point, this was fixed without realizing, perhaps the result of a code overhaul.

I'm going to close this issue, but if you continue to have this issue, more than a decade later, please feel free to reopen it.
