Quassel IRC - Feature #721

A way to reset the "red line"

Description

I'd realy like to see a feature to restet the red line, which marks from where on the conversation in a chatwindow is new.
At the moment, this line only resets when a chatwindow is in the background and another one is on top. A keyboardshortcut (like <Ctrl>+<M> in X-Chat) would be perfect in my point of view, but reseting the line whenever Quassel looses focus could also do the trick.

I realy like Quassel and I would even like it more with this feature. Keep on the good work and thanks for your time.

History

- Tracker changed from Bug to Feature

#2 - 02/29/2012 06:43 PM - Anonymous

Manual setting it is implemented in 9da8a8a1 (defaults to ^R). Automatically setting it on losing focus is a seperate issue (#755)
