

Quassel IRC - Bug #735

Quassel does not reconnect after suspend/resume

07/03/2009 10:41 PM - EvilGuru

Status:	Resolved	Start date:	07/03/2009
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Quassel Client	Estimated time:	0.00 hour
Target version:	0.6.0	OS:	Any
Version:	0.4.2		
Description			
<p>When I restore either my Linux desktop or Macbook (10.5.7) from sleep (ACPI S3 'suspend to RAM') quassel does not automatically reconnect — even if it were connected when the system was suspended.</p> <p>This is unusual for IM-type applications: both Adium and Collquy (OS X IM and IRC clients) restore-on-resume as do most mail readers. It may take a second or two for the network connection to restore, however.</p> <p>Quassel should detect being resumed from sleep and handle accordingly.</p>
