Quassel IRC - Feature #750

SSH (tunnel) support

07/25/2009 01:15 PM - bear.sh

Status:	New		**Start date:**	07/25/2009
Priority:	Normal		**Due date:**

Category:	Quassel Client		**Estimated time:**	0.00 hour
Target version:				
OS:	Any			

Description

I run the core on a system befind NAT. Therefor I think it would be quite confortable to use a SSH tunnel to connect to the core.
Needed components:
- Field to enter username
- Field to enter server address
- Local and remote port to bind
- Certifical (if used)
- Password
similar to something like this:
ssh -L LOCALPORT:localhost:COREPORT SERVER_IP

History

I do not think this should actuallly be implemented into quassel. This feature would much better fit into the scheme of a script, because this feature is rarely used, but is needed. With a script a User who needs this feature just loads the script and everyone is happy.
