

Quassel IRC - Feature #755

Automatically move red-line when window loses focus

07/29/2009 03:03 AM - Lingerance

Target version:	
OS: Any	
Description When the quassel-client loses focus the red-line should be (optionally) reset as if the buffer was changed. The could probably be implemented at the same time as #721 (A way to reset the "red line").

I'd like this feature as well, only further options could be to only reset the red-line when the client is minimized to the Task Manager and/or the system tray, rather than just loosing focus (which happens a lot more often if you have focus following your mouse.)

- Status changed from New to Closed

Duplicated (and the other one is mentioned by the patch).
