Quassel IRC - Bug #915

Spell checking occasionally stops working

02/16/2010 03:48 PM - pickscrape

Version:	0.5.0		**OS:**	Any

Description
I've noticed that from time to time spell checking will just stop working. To fix it I'll go into settings, uncheck the option, apply, recheck and hit OK. Then it's working again.
There doesn't seem to be any particular event that causes it, and it's difficult to tell anyway since you don't generally notice it gone immediately. It's only when the red wiggly line doesn't appear on a word you know you've spelt incorrectly that you know it's no longer operating.

History

#1 - 02/18/2010 04:53 PM - ruediger

- File 0001-Reset-EnableSpellCheck-on-switch-in-case-it-was-auto.patch added

Affects me too. It usually happens when I type in another language and thus there are a lot of errors. KTextEdit has an automatic mode which deactivates the Highlighter when too many errors were found.

http://api.kde.org/4.x-api/kdelibs-apidocs/kdeui/html/highlighter_8cpp_source.html#l00223

I think the best solution is to simply reset it when the Channel is switched (?or the input is send?). I wrote a small patch to do that.

#2 - 02/18/2010 07:18 PM - ruediger

Update: My patch is not working correctly!

I created a new patch in this merge request: http://gitorious.org/quassel/quassel/merge_requests/45

#3 - 02/25/2010 11:03 PM - al

- Category set to Quassel Client

- Status changed from New to Resolved

- Target version set to 0.6.0

- % Done changed from 0 to 100
