Target version:			
OS:	Any		

Description

It would be nice to have tab completion on /alias commands...

ie,

```
/foo<tab>
```

would show foobar or foobaz if you had those 2 aliases defined/setup.

History

#1 - 03/02/2010 01:18 AM - johu

- Tracker changed from Bug to Feature

#2 - 05/04/2018 08:39 AM - sera_denoir

Is there any chance of this ever being a feature? Eight years and no assignee or category I feel like it's been forgotten.
